Are government subsidies available for solar panels?

This article explains the government subsidies available for solar panels and how they help reduce installation costs. Solar energy is now becoming a normal part of our daily life. Most people have realized that a small rooftop system can reduce their reliance on power cuts, rising electricity prices, and unpredictable bills.

What is a solar subsidy scheme?

This is a central government programme that gives subsidies for rooftop solar installations. With an objective to achieve the capacity of 40,000 MW from connected grid rooftop solar projects, the scheme period is valid till 31 March 2026.

What is a government solar panel scheme?

In simple words, a government solar panel scheme is a plan that helps you install solar panels at a lower cost. Why do we need such schemes? Solar systems can feel quite expensive and that's why people who want to switch often hesitate because of the initial cost.

How much subsidy does a solar pump get in India?

Up to 30% or 50% of the total cost given for installation. The land owner will receive Rs 25,000-1 lakh per acre for the next 25 years. Together, you get up to 60% (or 80% in states mentioned above) subsidy on the solar pump. Also Read: EV Govt Subsidies in India: See How Much Can You Save From These Schemes
