

# Australia solar incentives

What is Australia's solar incentive system?

The backbone of Australia's solar incentive system remains the federal solar rebate, delivered through the Small-scale Renewable Energy Scheme (SRES). Under this scheme, homeowners installing systems under 100kW generate Small-scale Technology Certificates (STCs).

What are Australian government solar rebates & incentives?

The Australian Federal Government solar rebates and incentives offer substantial savings through its Renewable Energy Target (RET) program, helping homeowners and businesses reduce solar installation costs. Designed for systems under 100kW, the SRES provides upfront savings through Small-Scale Technology Certificates (STCs).

Are solar rebates still available in Australia in 2025?

Solar rebates in Australia have been a key driver behind the rapid uptake of home solar systems. In 2025, the government is shifting gears with both new incentives and gradual reductions. While federal solar panel rebates through the Small-scale Renewable Energy Scheme (SRES) are still in place, they've been scaled down slightly from 2024.

What are local solar incentives?
