

Croatia is moving forward with its largest grid-scale battery energy storage project thanks to a new investment from the European Bank for Reconstruction and Development (EBRD), the bank ...

Croatia's first battery energy storage facility connected to the national transmission grid is taking shape near Sibenik, marking a significant step in modernising the country's energy...

This dual system is crucial for supporting the seamless integration of more renewable energy into Croatia's power system. The project, expected to be completed by 2025, is a key part of ...

The European Bank for Reconstruction and Development (EBRD) has announced a direct equity investment of up to EUR16.8 million in IE-Energy Projekt, a newly established joint-stock company ...

The project will contribute to the country's energy transition goals, reduce its reliance on fossil fuels and help to stabilise the electricity system at a time of rising renewable penetration.

Summary: Croatia is rapidly adopting centralized photovoltaic (PV) energy storage systems to stabilize its renewable energy grid. This article explores the country's progress, key projects, ...

The Croatian battery news came in the wake of plans for a standalone utility-scale battery storage system in Serbia. The office of the Mayor of Leskovac revealed plans for a 125 MWh ...

The study will be completed by the end of 2025, and it will be publicly presented and made available for further use to support the development of a sustainable and competitive energy system ...

It was concluded that system flexibility and battery storage are essential components of the green transition and key to ensuring a stable and secure energy supply in the future.
