

Dushanbe solar energy for the environment

The location at Dushanbe, Tajikistan, which is in the Northern Temperate Zone, is good for generating energy using solar power but it's not perfect. The amount of energy you can get from ...

The main research objective is to develop an adaptive system for forecasting and managing photovoltaic energy in Tajikistan's mountainous environment, integrate operational data ...

Tajikistan presented its first-ever national Green Energy Roadmap at the 3rd International Conference on the "Prospects for the Development of Renewable Energy in the Republic of ...

Tajikistan's Environmental Protection HQ unveils a new solar power system, cutting electricity costs by 60%. Learn how this project advances national renewable energy goals.

This would involve the development of new hydropower and solar energy, sustainable heating and transport, enhanced energy efficiency, and adoption of low- carbon technologies and ...

Dushanbe has significant capacity to utilize solar energy as it enjoys over 300 sunny days a year. The truck will operate in the city generating clean photovoltaic electricity and will be equipped with USB ...

This article explores how the new energy storage box technology is transforming Tajikistan's energy landscape, enhancing grid stability, and supporting solar and wind integration.

The installation of solar panels has begun in the capital of Tajikistan, Dushanbe, including on roadways. This initiative reportedly aims to save electricity and ensure sustainable energy supply.

Collaborating on renewable energy projects in the fields of solar, wind, hydro, and geothermal energy to reduce carbon footprints and dependence on fossil fuels.

Dushanbe's story is a strong example of how even cities facing major environmental and economic challenges can chart a new, greener course--with the right planning, support, and vision.
