

How many EVs are there in South Africa?

South Africa, which boasts the most advanced e-mobility market in SSA, only had approximately 1000 EVs in circulation in 2022, out of a total fleet of 12 million vehicles. Kenya, on the other hand, had an estimated 350 EVs, with around 2.2 million registered vehicles in use across the country.

How much does an EV cost in South Africa?

However, most EVs available in South Africa are from high-end brands, with models starting at well over US\$100,000. The average price difference between ICE (US\$25,000) and EV (US\$111,000) is US\$86,000.

Are EVs a viable option in Africa?

Basic grid infrastructure and power sector maturity are also crucial for understanding African EV prospects, contrasting with mature markets where EVs currently have minimal impact on the existing power system and research attention is focused on higher-order considerations such as grid integration of heavy duty vehicles.

Do EVs have a fuel tank?

EVs have evolved to better compete with internal combustion engine (ICE) vehicles, with advancements in battery electric vehicles (BEVs), hybrid electric vehicles (HEVs), and plug-in hybrid electric vehicles (PHEVs), as shown in Fig. 3. BEVs, or pure EVs, rely solely on batteries for power and do not have a fuel tank.
