

Finnish AI company Capalo AI secures EUR11M Series A led by Heartcore Capital to scale its virtual power plant and battery storage optimization across Europe.

Finland's solar and storage sectors are heating up. Explore the 23 GW+ pipeline, bold PPAs, and the AI-powered BESS shaping its energy future.

Finland based Nordi Oy is planning a solar power plant and energy storage facility near the former Holstinharju landfill area in Kemi. The project is in the former waste station area and its ...

The status of these energy storage technologies in Finland will be discussed in more detail in the next sub-sections, giving a better understanding of the current and potential role of these ...

Discover how Finland is leading Europe's energy storage innovation to balance renewable integration and industrial demand. This guide explores cutting-edge technologies, market trends, and practical ...

With projects ranging from underground thermal vaults to cutting-edge battery systems, Finland's approach to energy storage is about as diverse as its famous midnight sun phases.

Finnish renewables developer Nordi Oy plans to build a 50-MWp solar farm, coupled with storage, near a former landfill site in Kemi, a city on the Bothnian Bay in Lapland.

Stockholm-based Byhmgard announced today that it signed a new deal to deliver four battery energy storage solutions (BESS) to projects in Finland for Finnish company Solarigo Systems ...

With wind power generation jumping 23% year-on-year in Q1 2025 [1] and solar capacity projected to triple by 2027 [3], Finland's energy storage industry is racing to solve its most pressing challenge: ...

Finland has taken a significant step toward enhancing its energy infrastructure by launching a pioneering grid-forming battery energy storage system (BESS) in the Nordic region.

Finland solar storage
