

French wind power trees

What is a 'wind tree'?

(Photo: New World Wind) French energy startup New World Wind has developed the "WindTree", a tree-shaped turbine equipped with micro-wind turbines called Aeroleaf Hybrid.

Can a French entrepreneur make a wind turbine look like a tree?

Luckily, a French entrepreneur may have the solution - a small-scale wind turbine that look just like a tree! What are Wind Trees?

Could 'wind trees' be a solution to 'green energy'?

Renewable energy innovators are exploring inventive approaches to incorporate green energy into our homes - a unique solution to this challenge comes in the form of 'wind trees', a micro wind turbine designed to mimic trees.

What is Windtree & how does it work?

Join now to broaden your international horizons. French energy startup New World Wind has developed the "WindTree", a tree-shaped turbine equipped with micro-wind turbines called Aeroleaf Hybrid. These leaves keep rotating to capture the air and solar panels absorb sunlight just below the leaves.

The Wind Tree, is it worth it? It is a unique wind turbine design that mimics the structure of a tree, with small turbines arranged like leaves on its branches. This innovative technology was developed by ...

What are Wind Trees? Known as the "Wind Tree" (or Tree Vent, in French), this wind turbine could lead to wider adoption of wind power in urban centers, where they would be able to make use of low winds that circulate ...

The Wind Tree is an unusual construction: a wind turbine in form of a tree with leaf modules that turn in the wind and supply energy. The concept stems from a French company; the frame is provided by Tecpoles. In early ...

A French company called "New World Wind" has developed a unique wind farm that looks like a tree with leaves looking almost like life-sized L egos. The company is inspired by nature and offers ...

France and Europe are embracing the potential that "wind trees" present Several French start-ups now offer a variety of wind trees for customers to peruse at their own discretion, with the companies boasting ...

Renewable energy innovators are exploring inventive approaches to incorporate green energy into our homes - a unique solution to this challenge comes in the form of "wind trees", a micro wind turbine ...

The Wind Tree is ideal for companies and communities. It reduces the carbon footprint of organizations by producing cleanly produced green energy.

French wind power trees

France's "Wind Tree" is a unique renewable energy innovation that uses 36 leaf-shaped mini turbines to harvest clean energy from low-speed urban winds. This artistic yet functional design blends ...

Jérôme Michaud-Lariviere, the founder of the New Wind company, developed the WindTree structure, which resembles a natural tree in shape and size and is capable of producing energy almost 24 ...

French energy startup New World Wind has developed the "WindTree", a tree-shaped turbine equipped with micro-wind turbines called Aeroleaf Hybrid. These leaves keep rotating to capture the air and ...
