

GW-scale solar energy investment

Policymakers in some of the world's largest economies are reducing support for solar power generation. Even so, Goldman Sachs Research expects rapid growth in the sector, with global ...

Global solar installations reached nearly 600 GW - an impressive 33% increase over the previous year - setting yet another record. Solar accounted for 81% of all new renewable energy ...

Each quarter, the National Renewable Energy Laboratory conducts the Quarterly Solar Industry Update, a presentation of technical trends within the solar industry. Each presentation ...

Released by ISA Assembly President and India's minister for new and renewable energy, Pralhad Joshi, the four-part report series highlighted key growth trends, investment data, and ...

In 2024, generators added a record 30 GW of utility-scale solar to the U.S. grid, accounting for 61% of capacity additions last year. We expect this trend will continue in 2025, with 32.5 GW of new utility ...

Wood Mackenzie projects 197 GWdc of new utility-scale solar to be built between 2025 and 2030, but uncertainty remains due to the Department of Interior's memorandum on permitting ...

Growth in utility-scale and distributed solar PV more than doubles, representing nearly 80% of worldwide renewable electricity capacity expansion. Low module costs, relatively efficient permitting processes ...

High CapEx: Solar projects require substantial upfront investment in equipment, installation, and site preparation. The average residential system cost is \$10,000 to \$25,000, with a levelized cost of ...

BNEF finds that utility-scale solar photovoltaic investment was particularly hit, falling 19% compared to the first half of 2024. The markets that saw the largest year-on-year declines in ...

The study found that more than 35 countries achieved GW-scale annual installations. Regions such as Africa and the United Arab Emirates (UAE) are ramping up solar capacity, ...
