

Gas Station Microgrid Project

Enel X has completed construction of an innovative microgrid that leverages solar energy and battery storage to support the facility and EV charging at Global Partners LP's Alltown Fresh service ...

It did pass a law that could strengthen the state's electricity reliability by encouraging the construction of more microgrids -- combinations of small-scale gas-fired power, solar, and...

The scenarios considered constructing Solar+ systems to fit gas station and convenience stores with varied sizes (small, medium, and large) and goals (resilient scenarios).

Enel's Innovation Team developed a first-of-its-kind service station microgrid in Ayer, Massachusetts, paving the way for commercial deployment of integrated microgrids and energy resilient gas stations ...

The Blue Lake Rancheria (BLR) is located in California's Humboldt Bay community and houses tribal government offices, electric vehicle charging, a convenience store and gas station, a hotel and ...

We have around 21 BESS and microgrid sites with 442 megawatts (MW) of utility-owned energy storage and another 40+ MW in development. Typically, these battery systems and ...

The RFP focused on projects that deployed commercially viable energy resilience technologies that could provide energy resilience, risk management, clean energy and/or climate ...

Designed and built by Schneider Electric and Black and Veatch, the microgrid is powered by 1.8 MW of solar energy, 3.2 MW of LFG electricity and 6.45 MW from a natural gas/diesel power ...

Learn how a community microgrid can provide a layer of energy resilience, and how the Microgrid Incentive Program (MIP) can assist with project development and help your community pay for it.

NLR is collaborating with the San Diego Gas & Electric Co. to model a microgrid in Borrego Springs, California, and evaluate how a microgrid controller with advanced functionality ...
