

# German Energy Storage New Energy Project

The launch of these projects marks a major milestone in TotalEnergies' development of battery energy storage capacity in Germany, where the Company has operations in the production, trading, ...

In December 2023, the Federal Ministry for Economic Affairs and Climate Action (BMWK) published its "Power Storage Strategy" to accelerate the development of new capacities.

As the share of renewable energy in the power grid continues to grow, so does the need for efficient electricity storage. In 2024, battery storage systems in Germany grew by approximately 50 percent ...

Germany's Energie Baden-Württemberg AG (EnBW) has made its final investment decision on a large-scale battery storage project. The publicly-traded energy company has announced the 400 MW / 800 ...

Germany's grid-scale battery buildout hit a record year in 2025, with installed capacity now standing at 2.4 GW. But BESS additions come in slower than pipeline projections assumed, as grid connections delay ...

French firm TotalEnergies has taken investment decisions on six new battery storage projects in Germany, with nearly EUR160m earmarked for their development. The projects will be developed by Kyon ...

In the following, we provide an overview of the recent developments of the legal framework of BESS projects and outline which obstacles to BESS projects still require further efforts by the new German ...

2025 saw genuinely large-scale BESS projects start construction in Germany, strengthening confidence among stakeholders. But significant challenges remain around grid connection, connection ...

TotalEnergies plans to invest EUR160m (\$172.8m) in six new battery storage projects in Germany, totalling 221MW of capacity. The projects have been developed by TotalEnergies affiliate Kyon Energy. Most ...

Germany is about to become home to Europe's largest battery storage system - a massive 1 gigawatt (GW) / 4 gigawatt-hour (GWh) project in Jämschwalde, Brandenburg.
