

Green electricity somalia

How much electricity does Somalia have?

Somalia's energy story is at a juncture: it has an installed capacity of approximately 400 megawatts(MW),with 300 MW powered by diesel and 100 MW by solar and wind. Today,about 80% of urban households and only around 24% of rural communities have access to electricity,according to World Bank data.

Should Somalia invest in solar & wind?

This is not just a statistical correlation; it is a clear indication that investing in solar, wind and other renewables could fundamentally place Somalia on the path of increased energy access and green transition. By contrast, other forces are pushing in the wrong direction.

Is Somalia a sustainable country?

At the same time,80% of Somalia's energy consumption for cooking still comes from biomass fuels,which accelerates deforestation and biodiversity loss. Yet,Somalia is also one of Africa's richest countries in renewable potential.

Should Somalia be betting on Clean Power?

The data makes it clear: renewables aren't just environmentally sound; they're also economically and socially transformative. For Somalia,betting big on clean power may be the smartest and most achievable development decision of this decade.

Somalia's renewable energy potential can alleviate poverty, reduce emissions, and drive socioeconomic growth but requires strategic investments and policies.
