

How big is the largest wind turbine

The MySE 16-260 earns its largest-ever tag thanks to its rotor diameter of 260 meters (853 feet) and its swept area of 53,902 square meters (580,196 square feet); it's also the most ...

The Vestas V236-15.0 MW is the largest wind turbine in the world, with blades stretching 115.5 meters and a total height of 280 meters. Generating 15 MW of power, it can supply electricity to ...

This is GE's Haliade-X nacelle--the heart of the world's most powerful wind turbine. With a colossal 12MW output and 107-meter blades, it can generate enough electricity to power over ...

This is a list of the most powerful wind turbines. The list includes wind turbines with a power rating that is within 5 MW of the current most powerful wind turbine that has received customer orders that is at ...

The MySE 16-260 turbine, produced by Mingyang Smart Energy, is recognized as the largest and most powerful wind turbine to date, boasting a rotor diameter of 260 meters (853 ft) and a ...

Vestas is the biggest wind turbine maker in the world, and you can expect it to have some of the tallest wind turbines. This offshore wind turbine is built on a 21,000 square feet swept ...

Dongfang Electric 26 MW Turbine: Largest Wind Turbine in the World ... In October 2024, Dongfang Electric Corporation (DEC) unveiled the largest wind turbine in the world, with a capacity of 26 MW.

Explore the top 13 largest wind farms in the world by capacity, with key facts, stats, and global clean energy insights.

The world's largest wind turbine--currently being tested off the coast of China--has blades that are more than twice as long as a Boeing 777's wingspan.

With a capacity to generate 15 megawatts of power, the Vestas V236-15.0 MW is the largest and most powerful wind turbine as of 2025 to have been commercially deployed.

How big is the largest wind turbine
