

How to install photovoltaic panels without getting scammed

Are solar panels a scam?

Solar panels themselves are not a scam. When the sun shines on solar panels, they produce electricity that can be used to power appliances and devices in your home. Making your own solar energy this way saves you money on your utility bills. That's not to say solar panel scams aren't real--just that the technology itself is not the problem.

How do I avoid getting scammed with solar panels?

To avoid getting scammed, you need to know what to look out for and when to walk away. Here's our guide to spotting solar panel scams and finding a great installer. If something you see or hear from a salesperson sounds too good to be true, it probably is.

Can I use solar energy without installing solar panels?

One way to take advantage of solar energy without installing solar panels on your home is to subscribe to a community solar farm. You won't save as much money as installing a solar system, but there is no upfront cost or installation, so it could be a great option if your home isn't a good fit for solar.

How do I safely install solar panels?

To safely install solar panels alone, the following steps must be taken. Research the equipment and tools needed. Tools needed for DIY solar panel installation include a saw, multimeter, drill, pry bar, and wire cutters, among others. Speak with a professional to ensure you have everything you need before beginning the installation.
