

Illegal use of solar power generation

Paradoxically, the states most likely to do this are some that would greatly benefit from solar power, like Oklahoma, Kansas, and Nebraska. This article will list all the states with the largest ...

This guide describes best practices for appropriately explaining and characterizing solar power activities and the fundamental importance of renewable energy certificates (RECs) for solar ...

Is solar power generation system illegal? The short answer? Absolutely not - but there's more to this story than a simple yes/no. Let's unravel the legal landscape of solar energy with real-world ...

Analysts who follow the industry say Citizens for Responsible Solar stokes opposition to solar projects by spreading misinformation online about health and environmental risks.

Like wind power, photovoltaic (PV) solar power has also been impacted by an increasing number of state and local ordinances that restrict where solar power may be deployed.

There are several national think tanks and groups, many that receive fossil fuel funding, that have been putting out arguments, often false, opposing wind and solar power for years.

One farm family hopes to see a solar energy plant built on their land. But in some places, efforts to build utility-scale solar and wind farms are met with fierce opposition.

The laws about off-grid electric, water, and sewage in every state in America, including information on how local governments make off-grid living illegal.

The report's state-by-state catalog describes local and state restrictions against the siting of renewable energy projects (primarily wind and solar), as well as instances of organized opposition ...

While renewable energy potential on public lands is promising, a significant challenge looms: transmission infrastructure. Recognizing this bottleneck, the Biden Administration empowered ...
