

India has developed solar power

Gujarat has been a leader in solar-power generation in India due to its high solar-power potential, availability of vacant land, connectivity, transmission and distribution infrastructure and utilities.

India reaches 100 GW solar energy capacity, marking a major milestone in renewable energy. Learn about key government schemes, rapid growth trends, and future targets for 2030.

India Solar Capacity: India surpasses 125 GW solar capacity milestone and powers over 50% of the grid with renewables. Read about the country's remarkable renewable energy progress ...

In a testament to the nation's commitment to a cleaner, greener future, India has achieved a historic milestone by surpassing 100 GW of installed solar power capacity, reinforcing its position ...

Initiatives like solar panels, solar parks and rooftop solar projects have brought about revolutionary changes. As a result, today India has successfully achieved the target of 100 GW of ...

India is spearheading a solar energy revolution, aiming for 500 GW of non-fossil fuel energy capacity by 2030. The country has rapidly expanded its solar sector, surpassing 100 GW in ...

Between 2014 and 2023, solar energy capacity in India expanded dramatically, fuelled by the decreasing costs of Photovoltaic (PV) technology, an investment-friendly climate, and India's vast solar potential ...

India's solar energy market is experiencing significant and rapid growth, establishing itself as a global leader in solar power deployment. Indeed, in 2023, India was the...

India has reached a historic milestone, surpassing the 50% renewable energy threshold in its total installed capacity, a target initially set for 2030 that has now been achieved five years ahead...

With 100 GW solar power achieved, India is moving towards energy independence and a greener future: Union Minister Pralhad Joshi. India has achieved a historic milestone by surpassing ...
