

This report by Cornwall Insight examines the potential for hybrid sites (i.e. energy storage co-located with wind or solar pv) on the island of Ireland and the benefits these can bring to the grid and to ...

We commissioned our first battery energy storage system at our Aghada generating site in Co Cork in 2022, capable of generating 19MW. We added a second battery on the same site in 2024 with an ...

The Irish energy and infrastructure landscape experienced a transformative year in 2025, marked by pivotal regulatory decisions, major project milestones and policy developments across ...

Energy storage systems are vital to Ireland's renewable ambitions. Learn how batteries, long-duration storage and grid upgrades will help deliver clean power

Statkraft, the largest producer of renewable energy in Europe, has launched Ireland's first ever four-hour grid-scale Battery Energy Storage System beside its windfarm at Cushaling in Co Offaly.

Large battery storage units are now playing a bigger role on Ireland's electricity system, after a large change introduced by EirGrid and its partners last year. Before November 2025, grid ...

Summary: Ireland is rapidly advancing its energy storage capabilities to support renewable energy integration. This article explores cutting-edge projects, policy drivers, and innovative technologies ...

Lightsource BP has proposed a significant 57MW solar and 54MW battery energy storage project in Carrickmacross, County Monaghan, Ireland. The company plans to outline the ...

Voltalia and its subsidiary, Renvolt, have signed a turnkey EPC contract for the 124.2-megawatt ESB Wexford Hub solar power plant in Ireland. Renvolt will oversee construction and ...

The Electricity Storage Policy Framework presents 10 government actions to support the role of electricity storage systems in Ireland's energy transition, identifying the key stakeholders and ...

Ireland Energy Storage solar Project
