

Kingston refinery uses a 25kW outdoor telecom cabinet

Can a telecom cabinet operate without heating and cooling?

Although the most rugged types of telecom equipment can operate without heating and cooling, most outdoor telecom cabinets are designed to comply with the GR-3108-CORE Class 1 specification, which requires that the internal temperature of the cabinet is maintained between 41°F (5°C) and 104°F (40°C).

Do Telecom cabinets need enclosure cooling?

The heat load of modern telecom cabinets is often high, and it's usually necessary to install enclosure cooling equipment to maintain the internal temperature below the higher limit specified by GR-3108-CORE. Enclosure heating may also be required in colder regions.

Which AC unit is best for off-the-grid applications?

Thermal Edge has launched two 48 Volt DC air conditioners designed for off-the-grid applications. These units are reputed to be the most efficient DC-powered air conditioners available and are specifically aimed at the telecom industry. Features include:
