

Large wind and solar generator power station control equipment

Manages power, frequency, and ramp parameters from solar, wind, and hybrid plants, providing easy interaction with multiple generation units and a dashboard for set-point achievement.

Automation, control, and monitoring --Solutions for generator control and automation, asset monitoring, and predictive maintenance that support individual units and large plants.

We offer generators for applications using natural sources like wind, solar, biomass, geothermal for power generation. Our wind generator is the best solution to gain the full wind energy potential for on- and offshore ...

Our complete range of power plant control room solutions is future-proof, offering dynamic flexibility to support evolving technology, equipment upgrades, and operational changes, ensuring long-term value and reliability.

Whether you work with renewables like wind and solar or industry bedrocks like coal, oil and natural gas, we can help you modernize your assets to increase visibility, reliability, and productivity--all while keeping up ...

Explore types of power generation equipment with Prismecs. Optimize turbines, generators, transformers, and energy systems for reliable, grid-ready power.

More than 130,000 wind turbines have already been automated with control technology from Beckhoff. It covers all functions, such as operational management, pitch control, yaw systems, vibration monitoring, and parking ...

Jinan Aojia New Energy Equipment Co., Ltd is a new energy enterprise dedicated to the design and sales of solar, wind power systems and related accessories. The products are suitable for household, commercial, ...

Emerson's Power Plant Controller boosts solar farm efficiency with real-time monitoring and predictive analytics, lowering costs and enhancing grid stability.
