

Lithium battery pack discharge equipment

We manufacture advanced charge/discharge testing equipment based on our unique electrical control technology, and have sold many of these products to users in Japan and overseas.

Charge and discharge equipment is one of the most important processes in lithium-ion battery manufacturing to determine the quality of lithium-ion batteries by repeatedly charging and ...

Adopting a wide voltage design, it is suitable for charging and discharging tests of battery modules of different voltage levels. Supports various lithium batteries and nickel metal hydride batteries. ...

Maximize efficiency with our Cylindrical Lithium Ion Battery Pack Charging & Discharging Machine. Optimal performance for your battery management needs.

Product description: The battery cycle charge and discharge system is a testing equipment for high voltage battery pack cycle life test, charge/discharge test, capacity test and charge-discharge ...

Battery cell, module and pack level charge/discharge cycle testing solutions designed to provide high accuracy measurement with advanced features. Most of our solutions are regenerative - so energy ...

ELP400 has built-in various test and maintenance modes, which are suitable for the discharge, charging, cycle charging and discharging tests of various lithium batteries on the market.

The battery charge and discharge machine is suitable for 18650 battery pack cycle life test. The battery tester uses the energy feedback technology, during the 18650 battery pack cycle life testing process, ...

With a wide voltage detection range from 9V to 99V which make it can measure varieties of batteries from 12V-84V. Charging test and discharge test can be performed for lead-acid batteries, lithium ...

Lithium Battery Discharge Machine is used to perform quick discharging in battery dismantling, storage, transportation, repair, recycling of battery manufacturers and car factory etc., which is the ideal ...

Lithium battery pack discharge equipment
