

Lithium carbonate brand name

What is lithium carbonate used for?

A medication used to treat bipolar disorder. Lithium carbonate is a medication used to treat manic episodes of bipolar disorder. Lithium has been used to treat manic episodes since the 19th century 3. Though it is widely used, its mechanism of action is still unknown Label 1,3,4,6.

Do you prescribe Lithium by brand name?

Always prescribe lithium by brand name as preparations vary widely in bioavailability. Lithium is available as two salts, lithium carbonate and lithium citrate, which are not dose equivalent. Lithium carbonate is supplied in tablet form (Camcolit ®, Liskonum ®, and Priadel ®).

What is lithium used for?

Lithium is used to treat mania that is part of bipolar disorder (manic-depressive illness). It is also used on a daily basis to reduce the frequency and severity of manic episodes.

Is lithium carbonate a depressant?

Lithium carbonate may increase the central nervous system depressant (CNS depressant) activities of Methotrimeprazine. Methoxsalen may decrease the excretion rate of Lithium carbonate which could result in a higher serum level. The risk or severity of CNS depression can be increased when Methoxyflurane is combined with Lithium carbonate.
