

London energy storage solar power plant

Will the London Underground be powered by solar energy?

Transport for London (TfL) has signed a major new deal to power the London Underground using clean solar energy, as part of a long-term plan to decarbonise the capital's transport network and support biodiversity. A new solar facility will be built in Longfield, Essex, by EDF Renewables UK through its subsidiary Longfield Solar Energy Farm Limited.

Who is EDF renewables UK?

Transport for London (TfL) has appointed EDF Renewables UK, through its subsidiary Longfield Solar Energy Farm Limited, to generate and deliver green electricity via a Power Purchase Agreement (PPA) over 15 years. The contract will see a new solar facility built in Longfield, Essex, and renewable energy generated for the Tube.

Will a new solar farm be built in Longfield?

EDF Renewables UK to begin construction work on a new solar farm in Longfield, Essex, from next year, providing green energy to the Tube, as well as decarbonising the National Grid and increasing its capacity.

What will a new solar facility do for the tube?

The contract will see a new solar facility built in Longfield, Essex, and renewable energy generated for the Tube. The facility will also support the decarbonisation of the National Grid and increase its renewable energy capacity.
