

Metal clad switchgear factory in Guatemala

Who makes metal clad & metal enclosed switchgear?

Powercon Corporation, located in Severn, Maryland, manufactures quality Metal-Clad and Metal-Enclosed Switchgear as well as a variety of other products serving the needs of the electrical industry.

What is metal-clad switchgear?

Metal-Clad Switchgear is an advanced and high-performance power distribution solution designed for medium and high-voltage applications.

Why should you choose metal-clad switchgear?

In addition to reliability and safety, Metal-Clad Switchgear is also known for its compact design, which minimizes the space required for electrical installations. This makes it a preferred choice for high-density urban power distribution, data centers, and underground substations where space is limited.

What are the advantages of metal clad switchgear?

A: Metal-Clad Switchgear provides numerous advantages for medium-voltage power systems, including enhanced operator safety, ease of maintenance, and long-term reliability. It features fully isolated compartments that minimize the risk of arc faults and electrical hazards, ensuring improved protection for personnel.
