

The latest news in energy storage from Power Engineering including updates on storage projects, technology, programs, and prices.

The latest updates in energy storage: innovation, markets, tech & industry insights

Moonwatt, a Netherlands-based energy storage developer, is addressing this challenge with a purpose-built sodium-ion battery energy storage system (BESS) engineered for hybrid solar applications.

This week, we spotlight 15 key developments in renewable energy storage projects worldwide, from groundbreaking megascale initiatives to market forecasts signaling unprecedented ...

A boom in battery storage has bolstered the demand outlook for lithium in 2026, driving hopes for an accelerated turnaround for an industry struggling with oversupply.

Latest news on energy storage projects, BESS, capacity expansion, and regulatory updates across Europe, US & Canada, Latin America, and Asia Pacific. Discover how energy ...

Ford will convert plants in Kentucky and Michigan to produce lithium iron phosphate batteries, including 20-foot DC container systems of the type used by data centers, utilities and large ...

China's 600 MW compressed air energy storage plant proves grid-scale power storage can scale without lithium or battery minerals.

The US startup Lunar Energy has raised another \$232 million towards its goal of dominating the US home energy storage market.

State-owned energy company Synergy has completed the 500MW/2,400MWh Collie Battery Energy Storage System (CBESS) in Western Australia, establishing Collie as home to Australia's largest ...
