

Nottingham Solar Power

What is the Great North Road solar park?

The Great North Road Solar Park is just one of the ambitious energy schemes proposed for Nottinghamshire in recent months. The scheme, planned for an area north-west of Newark, could generate up to 800MW and could power 400,000 homes - equivalent to the whole of Nottinghamshire.

Could a huge solar farm be near Newark?

Consultation has begun this week on a huge solar farm near Newark, which would be larger than any currently operating in the UK. The Great North Road Solar Park is just one of the ambitious energy schemes proposed for Nottinghamshire in recent months.

Will Newark & Sherwood District Council approve a solar farm?

Newark & Sherwood District Council recently refused permission for two large solar farms which covered nearly 145 acres of countryside. A 60-hectare farm was also approved on Green Belt land in Rushcliffe district.

How much solar power will the UK have by 2035?

Government targets state the UK should have 70GW of solar power by 2035 - a big step up from 15GW in 2023. It claims that the north and Midlands have historically had less than their share of solar projects, with 43 per cent of those approved or operating being located in the south.
