

Features intelligent deviation correction, non-stop hot-melt roll ...

Our main eva backboard cutter, silicon wafer laser cutting and mobile display cutting machine products are solar panel making machines, and used solar panel marking machines.

1.The design of the arc knife edge improves the trimming effect,the cutting edge is smooth,no burr. 2.4 unit drivers control 4 cutter heads,move in all directions with 8 cutter. 3.Lifetime of knife 50000times. ...

after laminating, the EVA heat and melt, then to solidifies due to the pressure, so it should be removed after laminating.

An automatic trimming machine is used to automatically remove burrs and ...

Solar Photovoltaic Module Trimming Machine Trimming (or edge-trimming) machine in a PV module production line is used after lamination (and sometimes after frame fitment) to remove...

Used for edge trimming of laminated PV modules to remove excess encapsulation film, glass burrs, or backsheet overflow, ensuring clean edges and precise dimensions.

The Trimming Machine is mainly used for trimming the excess part of EVA/TPT from the edge of PV module after the process of laminating. The precise cutting of laminated solar modules is an ...

The Ecocut 20 AP stands out as a highly efficient automatic foil cutter, specifically engineered for cutting encapsulant materials like EVA, TPO, PVB, and POE, as well as backsheets, tailored to the needs of ...

The Trimming Machine is mainly used for trimming the excess part of EVA/TPT from the edge of PV module after the process of laminating.

Features intelligent deviation correction, non-stop hot-melt roll change, and fast 12s cycle time. One-click switching supports various module sizes, enhancing both efficiency and stability. Precisely cuts and ...

An automatic trimming machine is used to automatically remove burrs and exceed materials from PV module edges after lamination. It can adapt to different sizes and shapes of panels and features high ...
