

How do you install solar panels on a tile roof?

The entire solar mounting system must bypass the tiles. This is typically achieved using specialized tile roof hooks. These hooks are designed to slide underneath a tile and anchor directly into the rafter. The hook's arm then extends out from under the tile, providing a solid attachment point for the rail system above the roof surface.

Should you install a solar racking system on a tile roof?

Investing in a high-quality, certified solar racking system is investing in the safety, longevity, and success of your project. **Never Mount Directly on Tiles:** Always use specialized tile roof hooks to anchor the mounting system to the roof rafters, bypassing the tiles completely.
