

The proposed solar facility is projected to generate approximately 169 GWh per year, a significant contribution to Kosovo's renewable energy objectives. The chosen site for the solar ...

The area is in the municipalities of Obiliq (Obilic) and Fushë Kosovë (Kosovo Polje), northwest of Prishtina. After more than four years of planning the project, KEK is receiving ...

The study includes the amount of electricity that can be supplied by installing solar and wind energy resources inside the urban area of Prishtina.

The primary data taken for this research are wind velocity, wind direction, and solar radiation. The study includes the amount of electricity that can be supplied by installing solar and ...

The project concerns the development of a 100MWac solar photovoltaic power plant (120 MWp), located between Obilic and Fushe Kosova, in close proximity to Pristina, in Kosovo.

Pristina, 26.03.2024 - Kosovo Energy Corporation (KEK) has signed an agreement for the implementation of 100 MW solar park project, in the amount of 103.7 million euros.

Government-controlled Kosovo Energy Corp. (KEK) said it is preparing to start building its Solar4Kosovo 1 photovoltaic plant near Prishtina. It informed the local community that agricultural ...

The project is an important milestone for the transition of the energy supply in the Western Balkan countries towards a sustainable electricity supply. This is the first large-scale photovoltaic system in ...

This project implemented thanks to German-Kosovar cooperation, through the German Development Bank (KfW) and the European Bank for Reconstruction and Development (EBRD), ...

To support the green transition in Kosovo*, one of its largest solar photovoltaic plants will be constructed on former ash dump fields near Pristina with a capacity of up to 100 MW.

Prishtina energy solar site
