

Proper use of outdoor power supply

What is electricity used for in a garden?

Electricity is often used to power lawn mowers and hedge trimmers, along with providing power for outdoor lights, pond pumps, heated propagators and greenhouse heaters. This source of power is obviously useful for gardeners; but care must be taken to avoid shocks, fire and electrocution. Suitable for... Keep safe in the garden: Suitable for...

Do I need an electric socket for my Garden?

Outdoor lighting systems and automatic irrigation may require electricity, along with electric mowers, hedge trimmers, strimmers, shredders and other power equipment used for garden maintenance. Pond pumps, heated propagators and some greenhouse heaters also need to be plugged into an electric socket.

Do pond pumps need to be plugged into an electric socket?

Pond pumps, heated propagators and some greenhouse heaters also need to be plugged into an electric socket. There are restrictions on the installation of electrical equipment (see providing sockets and wiring in appliances below), and safety checks should be carried out regularly, plus all equipment should be used with care to avoid accidents.
