

Solar photovoltaic panels are eliminated

Here's what you need to know about what's happening to federal tax incentives for everything from solar panels to heat pumps to electric vehicles, and how much time you have to get ...

President Trump just signed a bill into law that cuts the 30% residential solar tax credit in 2026--nearly a decade ahead of schedule. For homeowners considering solar, act now to lock in ...

The GOP tax and spending bill would eliminate federal tax credits for solar and other clean energy. NPR's Ayesha Rascoe talks with Doug Lewin, host of the Energy Capital Podcast, about the ...

If your solar panel system is installed or put into operation after the solar tax credit is eliminated or expires, you may not be eligible to claim the tax credit at all.

But while the solar tax credit was set to expire in 2032, the GOP tax bill accelerates that, eliminating the credit at the end of 2025. And homeowners aren't waiting to invest in solar until...

Over the past two decades, more than 5 million U.S. households from California to Georgia to Maine have put solar panels on their roofs, drawing energy from the sun and reducing ...

But homeowners planning to install solar panels were hit with a tight deadline to claim thousands of dollars in tax credits. In addition to slashing federal funding, the nearly 900-page bill...

In July, Congress passed H.R. 1, the federal budget reconciliation bill. Unfortunately, the sweeping legislation phases out a series of clean energy tax credits. That includes two tax credits ...

Installations must be fully complete and placed in service by December 31, 2025 to qualify for the 30% credit. There is no phaseout--the credit simply ends. The repeal applies to all residential ...

The residential solar Investment Tax Credit (ITC), which currently allows homeowners to deduct 30% of their solar installation costs from their federal tax bill, is on the chopping block in ...
