

South sudan electric vehicle safety

Is electric mobility inevitable in Sub-Saharan Africa?

The electric vehicle (EV) revolution is sweeping the world, and Sub-Saharan Africa (SSA) is no exception. Despite the environmental and sustainability narratives surrounding EVs, it is now undeniable that the transition to electric mobility is inevitable.

Is sub-Saharan Africa ready for EV adoption?

The electric vehicle (EV) revolution is sweeping the world, and Sub-Saharan Africa (SSA) is no exception. SSA faces unique obstacles to wider scale EV adoption, including the absence of clear policies, high purchase prices, inadequate infrastructure.

How many EVs are there in South Africa?

South Africa, which boasts the most advanced e-mobility market in SSA, only had approximately 1000 EVs in circulation in 2022, out of a total fleet of 12 million vehicles. Kenya, on the other hand, had an estimated 350 EVs, with around 2.2 million registered vehicles in use across the country.

How many electric vehicles will Africa have by 2050?

Namibia has set a goal of having 10,000 EVs on the road by 2030, while South Africa aims to have 2.9 million by 2050. Ethiopia has included the import of 800 electric buses and 148,000 electric vehicles in its 10-year development plan, which is set to end in 2030.
