

Spain Energy Storage Lithium Battery Project

This pumped-storage project, approved in 2024, has a hybrid battery of 15 MW and 7.5 MWh, enabling the surplus energy from the dam to be stored. The installation optimises the energy flow of the River ...

Listed below are the five largest energy storage projects by capacity in Spain, according to GlobalData's power database. GlobalData uses proprietary data and analytics to provide a ...

Naturgy has started construction on its first battery energy storage projects in Spain, aiming to enhance grid flexibility and support renewable energy integration.

Spain continues to expand its battery energy storage capacity, with five new BESS projects in Asturias entering public consultation. Two of these projects have already received ...

Spain's EUR700 million program aims to boost battery storage capacity by adding 2.5 to 3.5 gigawatts, enhancing energy stability and supporting renewable integration. The initiative supports ...

Iberdrola España will install six Battery Energy Storage Systems (BESS) with a combined capacity of 150 MW. This is an innovative solution for the storage and integration of renewable ...

Spain has taken a decisive step in strengthening its energy infrastructure with the launch of a EUR700 million support scheme aimed at expanding large-scale energy storage across the country.

Spanish and European companies are leading a deployment of energy storage solutions to support the energy transition.

With an investment of up to EUR4.1 billion, the plant will create more than 4,000 direct jobs and thousands of indirect jobs, boosting the economy of Zaragoza, Aragón, Spain, and Europe.

Naturgy has started construction work on its first battery storage projects in Spain; batteries that will hybridise the photovoltaic parks of Tabernas I and II, in the province of Almería, and ...
