Spain is one of the first countries to deploy large-scale solar photovoltaics, and is the world leader in concentrated solar power (CSP) production. Spain is also one of the European countries with the most hours of sunshine. In 2022, the cumulative total solar power installed was 19.5 GW, of which 17.2 GW were solar PV installations and 2.3 GW were concentrated solar power. In the same year, solar power accounted for 11....

These are all the grants and subsidies that you can apply for when installing solar panels in each autonomous community. Iberdrola has compiled them for you

The boom in solar power installations were faster than anticipated and prices for grid connected solar power were not cut to reflect this, leading to a fast but unsustainable boom in installations. Spain ...

In terms of smart meter installations, Spain has almost reached a 100% penetration rate following a government mandate. This country profile highlights the good and the bad policies and practices of ...

So, what's holding back Spain's residential solar revolution? This article uncovers the top five residential solar challenges Spain faces in 2025--from bureaucratic drag to installer gaps, and from financing ...

Two technologies were the main contributors to this historic milestone: wind power, leading the mix with 23.5% of the total, and photovoltaic power, which produced 33.8% more than in ...

With the recent self-consumption regulations and changes to the Spanish PV law, the path has been made even easier for individuals and companies wishing to invest in this technology.

Spanish civil engineering and construction company Obrascon Huarte Lain SA (BME:OHLA) said on Monday that it has been awarded a contract valued at over EUR 45 million ...

Photovoltaic cells have been the building blocks of a solar power boom spurred by Prime Minister Pedro Sánchez, whose support for renewables, combined with Spain's abundant sunshine, ...
