

Uninterruptible power supply for garage

What is an uninterruptible power supply (UPS)?

However, typical desktop computers, routers, and similar devices still need to be plugged into a power source all the time to work. That's where an uninterruptible power supply (UPS) comes in. Its main function is to act as a big battery that powers your devices when your electricity goes out.

How does a garage door opener work with an ups?

For a garage door opener, the UPS would install on the garage ceiling and plug into the outlet where the opener would normally plug in. From there, plug the opener in the UPS for back-up power.

Does Smart-UPS provide a specific size garage door opener?

The Smart-UPS product line produces the pure sine wave. If you provide power requirements of the garage door opener, perhaps we could provide a specific size UPS. However, one thing to note is the UPS will provide power as soon as utility power is lost, so the UPS may exhaust all of its battery power before you return home to open the door.

Do smart devices need an uninterruptible power supply (UPS)?

Many smart devices have built-in battery packs, with modern laptops packing enough cells to last a whole day. However, typical desktop computers, routers, and similar devices still need to be plugged into a power source all the time to work. That's where an uninterruptible power supply (UPS) comes in.
