The agrivoltaic plant will make use of the Holy See's property at Santa Maria di Galeria. Located on the edge of Rome, the 424-hectare site houses the transmission facilities for Vatican ...

Pope Francis has commissioned an agrivoltaic plant to be located in the extraterritorial area of Santa Maria di Galeria that will ensure the complete energy sustenance of Vatican City.

In a letter to the church, the Pope said the project will be developed on Vatican-owned property outside of Rome that spans 424 hectares, adding further capacity to existing solar panel installations in the ...

In a quiet corner of the Roman countryside, an ambitious project is taking shape--one that seeks not only to power the Vatican City entirely through renewable energy, but also to embody the...

As a result of the completion of this project, Vatican City has joined Albania, Bhutan, Nepal, Paraguay, Iceland, Ethiopia, and the Democratic Republic of Congo as the eight countries in ...

Pope Francis has renewables on his mind as he says he wants Vatican City to run on solar power. To achieve his aim, solar panels will be installed on a Vatican-owned property outside ...

This initiative is part of the Vatican's ongoing efforts to combat climate change and promote sustainability. Pope Francis said the Vatican is committed to "contribute to the efforts of all ...

The solar power plant is intended not only to power these antennas, but also "to ensure the entire energy subsistence of the Vatican City State," says the Pope.

The heart of this change is located at Santa Maria di Galeria, a former Vatican Radio site that has been transformed into a solar energy hub. This project was carried out by ACEA, an Italian ...

The Vatican is now completely powered by a farm that sports solar panels to help shade-tolerant crops thrive. This new coupling of solar and agriculture is growing fast.
