

Vietnam's solar energy storage policy

What does Vietnam's Solar Policy update mean for energy storage?

Vietnam's solar policy update highlights growing role of energy storage. (Photo: iStock) Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing location-based pricing and, for the first time, incorporating energy storage systems.

Does Vietnam have new feed-in tariffs for solar power?

April 2025 | Southeast Asia Impact Alliance Vietnam is taking another step toward modernizing its renewable energy sector by unveiling updated feed-in tariffs (FiTs) for solar power, with a notable emphasis on encouraging battery energy storage systems (BESS).

What are the conditions for solar storage in Vietnam?

Conditions for systems with storage include a minimum storage capacity of 10% of the solar plant's installed capacity, a charge/discharge time of 2 hours, and at least 5% of total generation used for charging the storage system. Overall, projects with storage receive higher FIT rates. Previously, Vietnam's FiTs were relatively low.

Does Vietnam have a solar power industry?

Vietnam's solar power industry has grown rapidly since 2017, driven by generous feed-in tariffs and strong government support. The country now has one of the highest installed solar capacities in Southeast Asia, contributing significantly to its renewable energy goals.

2. What challenges is Vietnam's solar power sector facing?

Vietnam's solar policy update highlights growing role of energy storage. (Photo: iStock) Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) ...

Vietnam's solar feed-in tariff rates in 2025 The newly released FiT rates for 2025 distinguish between ground-mounted versus floating solar projects and whether or not they include ...

As global costs for solar, wind, and battery storage systems fall, Vietnam could replace fixed feed-in tariffs (FiTs) with standardized competitive auctions to procure clean energy at the ...

Looking forward, the future of Vietnam's solar power industry will depend on the government's ability to address these challenges and create a more stable regulatory environment. ...

April 2025 | Southeast Asia Impact Alliance Vietnam is taking another step toward modernizing its renewable energy sector by unveiling updated feed-in tariffs (FiTs) for solar power, with a notable ...

Recently, in Ho Chi Minh City, the Vietnam Energy Association (VEA) in collaboration with the Electricity Authority - Ministry of Industry and Trade organized the 5th Vietnam Clean Energy ...

Vietnam's Ministry of Industry and Trade is proposing a set of financial mechanisms to support the

deployment of residential solar and storage installations designed for self-consumption.

Vietnam's solar strategy for trade-tense times Vietnam's amendment to the National Power Development Plan VIII (Decision 768/QD-TTg) to 2030, reaffirms its commitment to renewable ...

- The 5th Vietnam Clean Energy Forum, themed "Policy and technology solutions to Promote Energy Storage Systems and Industry parks" Solar power in Vietnam," was successfully ...

Household rooftop solar systems are key to meeting Vietnam's renewable energy goals. Households installing rooftop solar systems for self-generation and self-consumption, with integrated ...
