

What to pay attention to when using solar panels

What do I need to check before installing solar panels?

Before installing solar panels, you should check where you live to see if you require a permit.

Is investing in solar power a good idea?

Before investing in solar power, it's important to be vigilant and considerate of various factors. Solar panels are the most popular form of renewable energy for private homes, but they come with a long list of considerations before you make a decision.

What are the risks of DIY solar panel installation?

DIY installations carry numerous other risks, most of which are associated with the pitfalls of improperly installing anything on a roof. If you try to install solar panels by yourself, you run the risk of voiding your warranty.

What should you avoid when washing solar panels?

Washing solar panels with a water hose (or letting rainstorms do it for you) will do the trick. Using soap can leave streaks that can potentially damage solar panels. Ultimately, solar panels are a somewhat "set it and forget it" external addition.
