

Wilson amplifiers review

How many square feet does a Wilson AMP cover?

The amp was suppose to cover 2500 sq ft, when I installed it, you had to be within 6 feet to have any improvement in cell service. Found out from wilson tech support that the reconditioned unit I purchased with a one year warranty has a high failure rate within one to two months. Very disappointed that the reconditioned unit is not reliable!!

Are Wilson dual band boosters better?

The original Wilson dual band boosters were better in my opinion. The performance on a fringe location is ...The performance on a fringe location is barely acceptable. The amplified signal within the building has a very short range from the indoor antenna; on the order of feet.

What's your experience with Wilson Pro 70 plus?

Very bad experience with both order processing as well as the problem resolution. We ordered a Wilson Pro 70 Plus (50 ohm) with Omni/Dome Antenna (over \$1,000, total). When we received the shipment the package only contained wiring, no amplifier.

Can I use a pizza pan with a Wilson 311155?

It was also very helpful to read reviews that have been posted. Signal increased to two bars or better. Pizza pan on top of fiberglass RV works (to attach magnetic antenna). Highly recommend WeBoost Drive 4G-X used with Wilson 311155 (inside antenna).

Our dedicated customer-support team will gladly assist you throughout your Wilson Amplifiers process, from initial consultation to after-sale support for a convenient and stress-free buying experience.

Many happy customers have left us their review. Take a look and let them tell you how a signal booster from Wilson Amplifiers can help you.
